*The 2010 national data are incomplete as the following data were unavailable: the Quarters 1 and 2 2010 HSE-Midland Area and Southern Area data, the Quarter 1 2010 HSE-Mid Western Area MenC₂ data and the Quarter 4 2010 HSE-North Eastern Area data. In addition, BCG data were only available from three HSE Areas in Quarters 1 and 2, four HSE Areas in Quarter 3 and five in Quarter 4.

Please note while North Lee and South Lee are two separate LHOs their combined immunisation uptake data are reported here.

Immunisation uptake (%) at 24 months of age in 2010 (i.e. cohort born 01/01/2008-31/12/2008*), based on available data

* Since September 1st 2008 the new primary childhood immunisation schedule has been implemented. The changes to the primary schedule for children born on or after 1st July 2008 include introduction of a hepatitis B vaccine (as part of a 6 in 1 vaccine) given at 2, 4, 6 months of age, introduction of pneumococcal conjugate vaccine given at 2, 6 and 12 months of age and a change in timing of meningococcal serogroup C conjugate vaccination, now given at 4, 6 and 13 months of age. Therefore, HepB₃ and PCV₃ uptake data presented here are only for those born between 01/07/2008 and 31/12/2008.

† The 2010 data for those at 24 months are incomplete as the following were unavailable: the Quarter 1 2010 HSE-Midland and Southern Area data, the Quarter 2 2010 HSE-Midland Area data and the Quarter 4 2010 HSE-North Eastern Area data. The national HepB₃ and PCV₃ cohorts (combined Quarters 3 and 4 data) were 36,602 and 36,551, respectively.

Please note while North Lee and South Lee are two separate LHOs their combined immunisation uptake data are reported here.
