na=not available

Since T<sub>3</sub> and P<sub>3</sub> uptake identical to D<sub>3</sub> uptake only D<sub>3</sub> uptake figures are presented

\* Since September 1st 2008 the new primary childhood immunisation schedule has been implemented. The changes to the primary schedule for children born on or after 1st July 2008 include introduction of a hepatitis B vaccine (as part of a 6 in 1 vaccine) given at 2, 4, 6 months of age, introduction of pneumococcal conjugate vaccine given at 2, 6 and 12 months of age and a change in timing of meningococcal serogroup C conjugate vaccination, now given at 4, 6 and 13 months of age. Therefore, HepB<sub>3</sub>, MenC<sub>2</sub> and PCV<sub>2</sub> uptake data presented here are only for those born between 01/07/2008 and 31/12/2008 and MenC<sub>3</sub> data are only for those born between 01/01/2008 and 30/06/2008.

† The 2009 data for those at 12 months are incomplete as the following were unavailable: the Quarter 1 2009 HSE-E D<sub>3</sub>, T<sub>3</sub>, P<sub>3</sub> and Polio<sub>3</sub> data for those born on the 31/03/2008; the Quarter 3 2009 HSE-M data, HSE-S data, HSE-E MenC<sub>2</sub> and PCV<sub>2</sub> data and HSE-MW MenC<sub>2</sub> data and; the Quarter 4 2009 HSE-M, HSE-MW and HSE-S data. The available 2009 national 12 month D<sub>3</sub>, T<sub>3</sub>, P<sub>3</sub>, Hib<sub>3</sub> (n=66,913) and Polio<sub>3</sub> cohort data may be around 88% (this figure is an estimate only) of the 2009 national birth cohort. The national MenC<sub>3</sub> cohort data (n=37,434) are complete (for Quarters 1 and 2 2009). The available national HepB<sub>3</sub> (n=29,486), MenC<sub>2</sub> (n= 20,838) and PCV<sub>2</sub> (n=22,401) data may be around 76%, 54% and 58% (these figures are estimates only), respectively, of (the combined Quarters 3 and 4) national birth cohorts.

BCG uptake data were available for the HSE-M, HSE-MW, HSE-NW, HSE-SE and HSE-S Areas (HSE-S data relate to Kerry only) in Quarters 1 and 2 2009; for the HSE-MW, HSE-NW and HSE-SE Areas in Quarter 3 2009 and for the HSE-NW and HSE-SE Areas in Quarter 4 2009. The available 2009 national BCG cohort data may be around 27% (this figure is an estimate only) of the national birth cohort.

Please note while North Lee and South Lee are two separate Local Health Offices their combined immunisation uptake data are reported here
