IMMUNISATION UPTAKE STATISTICS FOR IRELAND

A REPORT BY THE NATIONAL DISEASE SURVEILLANCE CENTRE

Quarter 2-2003

November, 2003

Summary

In Quarter 2-2003, national uptake rates for P_3 and $MenC_3$ at 12 months decreased by 1%, uptake rates for the other vaccines remained unchanged compared to Q1-2003. Uptake rates for D_3 , T_3 , Hib_3 , $Polio_3$ and $MenC_3$ were 80% while the uptake rate for P_3 was 79%.

At 24 months, national uptake rates for D_3 , P_3 , T_3 , and $Polio_3$ increased by 1% and $MenC_3$ by 2% in Quarter 2-2003 when compared with the previous quarter. Uptake rates for Hib₃ and MMR_1 remained unchanged when compared with Q1-2003. Uptake rates at 24 months for D_3 , T_3 , and $Polio_3$ were 86%, P_3 and Hib_3 uptake were 85% and $MenC_3$ uptake was 83% and MMR_1 uptake was 77%.

Introduction

The immunisation uptake statistics for children 12 and 24 months of age in Quarter 2-2003 and who have received three doses of vaccines against diphtheria (D₃), pertussis (P₃), tetanus (T₃), *Haemophilus influenzae* type b (Hib₃), polio (Polio₃), Meningococcal group C (MenC₃) and one dose of vaccine against measles, mumps and rubella (MMR₁; uptake at 24 months only) are presented in this report. These statistics relate to uptake in the cohorts born between 01/04/2002 & 30/06/2002 and 01/04/2001 & 30/06/2001.

Hib₃ and Polio₃ remained unchanged compared to the previous quarter while MenC₃ uptake increased by 1%.

The WHB reported the greatest increases in uptake rates at 12 months for D₃, T₃, Polio₃ and MenC₃ (3%) while the MWHB, NWHB and WHB all reported a 3% increase in P₃ uptake. Uptake of Hib₃ also increased by 3% in NWHB and WHB.

Vaccination coverage statistics for children 12 months of age in Quarter 2-2003 were 95% in Northern Ireland¹ and 91% for the United Kingdom as a whole².

Results

Immunisation uptake at 12 months in Quarter 2-2003

Immunisation uptake rates in children 12 months of age in Quarter 2-2003 are presented (Table 1). National uptake rates for D_3 , T_3 , Hib₃, Polio₃ and Men C_3 at 12 months were 80% and 79% for P_3 . The highest uptake rates at 12 months were reported by the NWHB at 86-89%, while the lowest rates were reported in the WHB at 72-74% (Table 1).

National uptake rates for P_3 and $MenC_3$ at 12 months decreased by 1%, uptake rates for the other vaccines remained unchanged compared to the previous quarter. Three of the eight health boards reported increases in uptake rates for all vaccines; MWHB (1-3%), NWHB (2-3%) and WHB (3%) [Appendix 1]. Uptake rates for all vaccines decreased by 1-2% in the ERHA, MHB and SEHB while uptake rates in the SHB decreased by 3-4%. In the NWHB uptake rates of D_3 , P_3 , T_3 ,

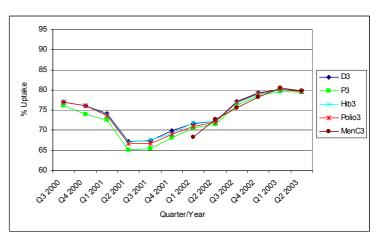

Figure 1. Quarterly immunisation uptake rates at 12 months in Ireland (Note: scale ranges from 60-95% uptake)

Immunisation uptake at 24 months in Quarter 2- 2003

Immunisation uptake rates in children 24 months of age in Quarter 2-2003 are presented (Table 2). National uptake rates were 86% for D₃, T₃, and Polio₃, and 85% for P₃ and Hib₃. Uptake rates for these vaccines ranged from 82-83% in the WHB up to 91-93% in the NWHB (Table 2). Uptake for MenC₃ at a national level was 83%, the ERHA having the lowest uptake rate at 79% and the MHB having the highest rate of 92%. MMR₁ uptake was 77% nationally, ranging from 71% in the WHB to 88% in the MHB (Table 2). The target rate of 95% uptake at 24 months was not reached at either national or health board level for any vaccine.

In Q2-2003, national uptake rate for MenC₃ at 24 months increased by 2%, D₃, P₃, T₃, and Polio₃ increased by 1%, and Hib₃ and MMR₁ remained unchanged when compared with the previous quarter (Figure 2 and Table 3). The largest increases in uptake for D₃, P₃, T₃, and Hib₃ at 24 months were reported in the MHB (all 3%). The ERHA and the MHB both reported a 3% increase in uptake of Polio₃. Seven of the health boards reported an increase in MenC₃ uptake, the largest being the MHB (7%).

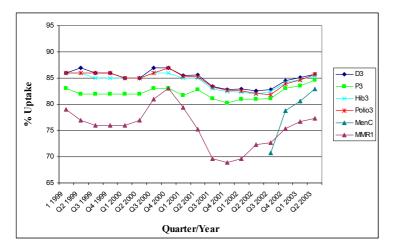

Figure 2. Quarterly immunisation uptake rates at 24 months in Ireland (Note: scale ranges from 65-95% uptake)

MMR₁ uptake by Health Board

In Q2-2003, the national MMR $_1$ uptake rate at 24 months was 77% - unchanged from the previous quarter. MMR $_1$ uptake rates increased in the ERHA (+3%), MHB (+1%) and NWHB (+3%)

Note: Prior to Q3-2002, NWHB provided DTaP/DT uptake as combined value, since not possible to accurately determine P₃ uptake for this health board, it was excluded from overall P₃ analysis

while decreases occurred in NEHB (-1%) SHB (-1%) and WHB (-3%). Rates in the MWHB and SEHB remained unchanged (Figure 3). The national MMR₁ uptake rate is still 6% below the uptake rate reported in Q4-2000 and 18% below the national target.

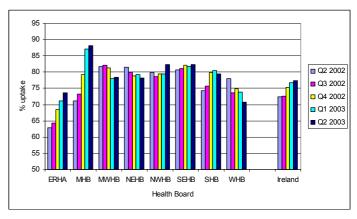

Figure 3. Quarterly MMR₁ uptake rates at 24 months by health board from Q2 2001 to present (Note: scale ranges from 50-95% uptake).

In Quarter 2-2003, vaccination coverage statistics at 24 months for D_3 , P_3 , T_3 , Hib_3 , $Polio_3$ and $MenC_3$ were 97% in Northern Ireland¹ and 93-94% for the United Kingdom as a whole.² MMR_1 uptake was 88% in Northern Ireland¹ and 79% in the UK.²

Detailed quarterly immunisation uptake statistics at 12 and 24 months for each health board are presented in Appendix 1 & 2 of this report.
