09/01/2026	<a href="#">ECDC</a>	<a href="#">Seasonal surveillance of chikungunya virus disease in the EU/EEA, weekly report</a>	05/01/2026	Update providing weekly overview of the countries and areas where chikungunya virus disease cases have been reported.	Emerging Infectious Diseases
09/01/2026	<a href="#">WHO</a>	<a href="#">Developing national meningitis plans: an operational manual</a>	19/12/2025	This operational manual aims to support countries in developing their meningitis plans, along the five pillars of the Defeating meningitis by 2030 global road map. It suggests an approach for the development of national meningitis plans through involvement of various stakeholders to ensure political buy-in. It also suggests activities to be included in the plan, with considerations to help fine-tuning the activities to make them very context appropriate.	Vaccination Preventable Disease Guidance
09/01/2026	<a href="#">WHO</a>	<a href="#">WHO guidance on the use of licensed human influenza A(H5) vaccines for the inter pandemic and emergence periods</a>	19/12/2025	This WHO guidance document outlines the primary objectives for the use of licensed human A(H5) vaccines for the inter pandemic and emergence periods, identifies key factors to support country-level decision-making, describes potential target groups based on risk of exposure, and includes a decision-aid matrix to assist countries in determining A(H5) vaccination approaches under various epidemiological scenarios. This WHO guidance supersedes previous recommendations on the topic and offers updated guidance to support countries in formulating their A(H5) vaccine policies.	Vaccination Preventable Disease Guidance
09/01/2026	<a href="#">WHO</a>	<a href="#">Integration of traditional, complementary and integrative medicine into health systems: conceptual framework</a>	20/12/2025	This publication provides a conceptual framework for the integration of traditional, complementary and integrative medicine into health systems. The framework identifies four models of integration—people-led, practitioner-led, coordinated and blended—based on two dimensions: decentralized versus centralized and pluralistic versus unified. It also links these models to the six building blocks of health systems, including leadership and governance, financing, service delivery, workforce, information systems and health products. Developed through evidence reviews, country visits and global consultations, the publication offers a foundation for policy dialogue, assessment and research. It provides Member States with practical guidance and tools to define, compare and strengthen integration in ways suited to their national contexts.	Public Health Systems & Tools/Policies/Reviews
09/01/2026	<a href="#">WHO</a>	<a href="#">National Health Simulation Exercise Programme:</a>	20/12/2025	This guidance document provides a strategic framework, outlining the rationale, essential components, and practical steps	Public Health Systems & Tools/Policies/Reviews

Date	Source	Item	Pub Date	Summary Details	Public Health Theme
		<a href="#">implementation guidance to strengthen emergency preparedness, readiness and response</a>		for establishing, implementing, and sustaining an NHSEP. It champions a structured, integrated approach to SimEx, moving beyond sporadic initiatives to achieve more impactful and lasting preparedness, operational readiness, and measurable improvement in emergency response capabilities. The NHSEP aims to strengthen core capacities as defined by the International Health Regulations (IHR, 2005) and related global frameworks (e.g., the Health Emergency Preparedness, Response and Resilience (HEPR) and the National Health Emergency Alert and Response frameworks), thereby enhancing national readiness for all-hazards health emergency management.	
09/01/2026	<a href="#">WHO</a>	<a href="#">Strategic objectives for the development and implementation of maternal, newborn and child health quality of care programmes</a>	22/12/2025	This publication sets out the strategic objectives that programme managers can use to help countries design, implement, scale up and sustain maternal, newborn and child health (MNCH) quality of care programmes. Structured around five objectives—Leadership, Action, Learning, Accountability and Measurement (LALA+)—it offers health-systems-oriented guidance and indicative outputs to strengthen governance, implementation, learning and improvement processes, accountability, and the use of data to deliver better outcomes and more people-centred care. It is designed as a practical, step-by-step resource where each objective is accompanied by indicative outputs and deliverables to guide action across structures, processes and capacities, and at national (macro), subnational (meso) and facility/community (micro) levels. Policymakers and programme managers should select and adapt the elements most relevant to their context and feasibility, supporting coordinated implementation, monitoring and learning aligned with broader MNCH and health-system priorities, including progress towards MNCH-related SDG targets.	Public Health Systems & Tools/Policies/Reviews
09/01/2026	<a href="#">WHO</a>	<a href="#">Measuring greenhouse gas emissions in health systems</a>	22/12/2025	This document has two aims. First, it defines a common approach for health system emissions measurement that is aligned with international standards and best practice. Second, it sets out how health systems can develop the necessary internal capabilities to measure their emissions consistently and effectively over time.	Environment & Health
09/01/2026	<a href="#">WHO</a>	<a href="#">WHO updated recommendations on HIV clinical management: recommendations for a public health approach</a>	24/12/2025	This document provides an overview of the updated World Health Organization recommendations for HIV clinical management, which focus on optimizing antiretroviral therapy, preventing vertical transmission, and enhancing tuberculosis prevention among individuals with HIV. These updates are intended to support global	Sexual Health

Date	Source	Item	Pub Date	Summary Details	Public Health Theme
				initiatives aimed at ending AIDS as a public health threat by 2030. Key changes include the introduction of new antiretroviral drugs and regimens, revised postnatal prophylaxis and breastfeeding guidelines for managing infants at risk of vertical transmission, and the endorsement of shorter tuberculosis preventive treatments to improve efficacy and adherence.	
09/01/2026	<a href="#">WHO</a>	<a href="#">Heat, air pollution and solar ultraviolet radiation: mass gathering-specific considerations and research gaps</a>	25/12/2025	The document aims to synthesize existing WHO and other United Nations (UN) guidance on heat, air pollution and solar UV radiation in mass gathering settings, identify knowledge gaps and help draft a research agenda for future evidence review and subsequent development of guidance and tools for mass gathering events.	Environment & Health
09/01/2026	<a href="#">WHO</a>	<a href="#">Midwifery Leadership Programme Facilitator Guide</a>	26/12/2025	The South-East (SE) Asia Region MLP reflects the findings of the SE Asia Region Midwifery Leadership Profiles (2022), in which a critical need for a leadership programme for midwives was identified. The MLP is also informed by the WHO Global Strategic Directions for Nursing and Midwifery (SDNM 2021), wherein strengthening midwifery leadership is one of the four global policy priorities, and the State of the World's Midwifery (SOWMy) report (2021), which regards midwifery leadership and midwife-led care as key global actions. 				Honduras (177 209). In South-East Asia, Indonesia (257 271 cases) and India (232 425) also experienced extensive outbreaks linked to monsoon-related transmission cycles.	
09/01/2026	<a href="#">WHO</a>	<a href="#">Essential care package to address mental health and stigma for persons with neglected tropical diseases</a>	01/01/2026	Over 1 billion people worldwide are affected by neglected tropical diseases (NTDs) and a similar number are affected by mental health conditions. These independently burdensome conditions are significantly interlinked. The Essential Care Package (ECP) to address mental health and stigma for persons affected by neglected tropical diseases (hereby referred to as the ECP) includes evidence-based mental health interventions, drawn from the WHO mhGAP guidelines for mental, neurological, and substance use disorders (3), particularly those listed in the UHC Compendium. Evidencebased interventions to reduce population health-related stigma and discrimination are included in the ECP in order to address the stigma experienced both by people living with mental health conditions and by those living with NTDs.
