

# Weekly report on COVID-19 deaths reported in Ireland

Report produced by Health Protection Surveillance Centre on 15/09/2021

This report includes data for COVID-19 cases notified on CIDR up to and including midnight on 14/09/2021 who have been notified as COVID-19 deaths

Note: Data were extracted from Computerised Infectious Disease Reporting (CIDR) system on 15/09/2021 and are provisional and subject to ongoing review, validation and update. As a result, figures in this report may differ from previously reported figures.

Table 1: Summary characteristics of COVID-19 deaths notified in Ireland with date of death during the latest epidemiological week, 08/09/2021 to 14/09/2021

Characteristics	Number of deaths	Percentage
Total number of deaths	11	
Age	Mean age (Years)	79
	Median age (Years)	81

The number of deaths described in the above table relate only to COVID-19 cases who died within this time period and whose death has been reported to CIDR up to 15/09/2021. It does not include deaths of COVID-19 cases reported to CIDR in the last week but with an earlier date of death. It also does not reflect the final number of deaths occurring for this period as the outcome may not yet have occurred, or is yet to be reported to CIDR.

**Table 2: Summary characteristics of COVID-19 deaths in Ireland, cases with a date of notification from 01/03/2020 to 14/09/2021**

**Table 5: Place of death for COVID-19 deaths in Ireland, cases with a date of notification from 01/03/2020 to 14/09/2021**

Place of death	Number of deaths	Percentage
Hospital	2,584	49.89
Residential Institution*	1,920	37.07
Hospice	53	1.02
Home	201	3.88
Other	74	1.43
Unknown	347	6.7

\*Residential institution includes: community hospital/long stay unit, homeless facility, mental health facility and nursing homes.

**Table 6: Summary of COVID-19 deaths linked to outbreaks in Ireland, cases with a date of notification from 01/03/2020 to 14/09/2021**

		Number of Deaths	Percentage
<b>Deaths linked to outbreaks</b>		3,389	65.44
<b>Outbreaks by location</b>	Nursing homes	2,108	62.2
	Hospital	794	23.43
	Community Hospitals/Long-stay units	131	3.87
	Residential institutions	102	3.01
	Other locations*	254	7.49

\* Other locations include community outbreak, extended family, hotel, other, other healthcare service, private house, public house, religious/other ceremony, workplace

Regarding deaths associated with COVID-19 hospital outbreaks notified to the HPSC, it cannot be automatically assumed that all of these cases acquired their infection in hospital as this information is not always reported to the surveillance system.

**Table 7: Number of COVID-19 deaths in Ireland by month of death, cases with a date of notification from March 2020 to September 2021**

## Technical Notes

### 1. Data Source

Data are based on statutory notifications and were extracted from Computerised Infectious Disease Reporting (CIDR) system at 08:34 on 15/09/2021. Data are provisional and subject to ongoing review, validation and update. As a result, figures in this report may differ from previously published figures.

### 2. Population Data

Population data were taken from Census 2016. Data were aggregated into the following age groups for the analysis of deaths for the entire pandemic: 0-24 years, 25-34 years, 35-44 years, 45-54 years, 55-64 years, 65-74 years, 75-84 years and  $\geq 85$  years. Data were aggregated into the following age groups for the analysis of deaths with date of death in the past 7 days: 0-64 years, 65-74 years, 75-84 years and  $\geq 85$  years.

### 3. CHO Areas

The counties covered by each CHO area are as follows:

CHO 1: Donegal, Sligo/Leitrim/West Cavan, and Cavan/Monaghan;

CHO 2: Galway, Roscommon, and Mayo;

CHO 3: Clare, Limerick, and North Tipperary/East Limerick;

CHO 4: Kerry, North Cork, North Lee, South Lee, and West Cork;

CHO 5: South Tipperary, Carlow/Kilkenny, Waterford, and Wexford;

CHO 6: Wicklow, Dun Laoghaire, and Dublin South East;

CHO 7: Kildare/West Wicklow, Dublin West, Dublin South City, and Dublin South West;

CHO 8: Laois/Offaly, Longford/Westmeath, Louth, and Meath;

CHO 9: Dublin North, Dublin North Central, and Dublin North West

### 5. Definition of a COVID-19 death used by HPSC

For surveillance purposes, COVID-19 deaths include deaths in all possible, probable and confirmed COVID-19 cases (as per the COVID-19 case definition) and all should be notified, unless there is a clear alternative cause of death that cannot be related to COVID-19 infection (e.g. trauma). There should be no period of complete recovery\* from COVID-19 between the illness and death. All COVID-19 deaths are notified regardless of the setting, including home, community and hospital settings. HPSC reports all deaths among these COVID-19 cases as outlined above and does not just confine the death reporting to those who die within 28 days of a positive test. This is in line with how COVID-19 cases are reported by the majority of European countries and follows WHO guidance for COVID-19 death surveillance.

\*Please note that discharge from ICU or hospital is not in itself evidence of recovery. To determine if the case had recovered, it should be based on clinical assessment or alternatively a period of  $\geq 3$  months must have elapsed since the case was initially diagnosed with COVID-19 and the case must have no evidence of COVID-19 infection prior to death as assessed by a clinician.

Deaths not reported as COVID-19 deaths:

1. Persons with COVID-19 may die directly due to accidents. Such deaths are not due to COVID-19 and should not be certified as such. This decision not to certify as COVID-19 death will be based on clinical judgement.

2. In some instances, a death due to COVID-19 may not be attributed to another disease (e.g. cancer) and would be counted as a COVID-19 death independently of pre-existing conditions that are suspected of triggering a severe course of COVID-19.
