

#### Epidemiology of COVID-19 Outbreaks/Clusters in Ireland - Weekly Report. Week 20, 2022

#### Weekly COVID-19 Outbreak Report for week ending 21/05/2022 Prepared by HPSC on 25/05/2022 Please note: Data are provisional

This report includes data extracted from the Computerised Infectious Disease Reporting (CIDR) on 25/05/2022 up to midnight 21/05/2022.

Reference dates:

| Waves                                | Dates                   |
|--------------------------------------|-------------------------|
| Wave 1 (Week 10 – 31 2020)           | 01/03/2020 - 01/08/2020 |
| Wave 2 (Week 32 – 47 2020)           | 02/08/2020 - 21/11/2020 |
| Wave 3 (Week 48 2020 - Week 25 2021) | 22/11/2020 - 26/06/2021 |
| Wave 4 (Week 26 – 50 2021)           | 27/06/2021 - 18/12/2021 |
| Wave 5 (Week 51 2021 onwards)        | 19/12/2021 onwards      |

The HPSC Epidemiology of COVID-19 Data Hub provides data on non-private household outbreaks. The Data Hub is updated Monday to Friday.

# Regional Departments of Public Health are currently prioritising the investigation and reporting of outbreaks in settings that benefit most from public health and clinical intervention. These settings include acute hospitals, nursing homes, community hospital/long-stay units, residential institutions, other healthcare settings, vulnerable populations, special educational needs schools/classes and childcare facilities. For this reason, outbreaks in other settings may be underestimated. This report focuses on these key settings/groups.

In addition, due to the surge in case numbers in recent months, the processing time of case notifications on CIDR has increased. Outbreak cases may not yet be processed and linked to their outbreak on CIDR. Due to these delays, an interim measure has been applied whereby the higher number between aggregate and outbreak linked confirmed case numbers is used in outbreak settings (report pages 9-19).

Due to the cyber-attack on the HSE IT systems on 14/05/2021, CIDR was unavailable for the reporting of COVID-19 outbreaks from 14/05/2021 to the 28/06/2021. As a result, there has been a delay in reporting for many outbreaks on CIDR. To account for this, outbreak week for all outbreaks created between May 14<sup>th</sup> and October 9<sup>th</sup> 2021 is based on the following algorithm: earliest of 1. outbreak recognition date; 2. first reported date; 3. outbreak created date.

Outbreak week is based on outbreak created date for all outbreaks created on or before May 13<sup>th</sup> 2021, and on or after October 10<sup>th</sup> 2021.

Please note COVID-19 outbreaks and cases are continuously validated/updated on CIDR.

The COVID-19 outbreak definition is available in Appendix 2 of this report and on the HPSC website.

Sincere thanks are extended to all those who are participating in the collection of data and reporting of data used in these reports. This includes the HSE COVID-19 Contact Management Programme (CMP), staff in ICU units, notifying clinicians, laboratory staff, public health doctors, nurses, surveillance scientists, microbiologists and administrative staff.

**Figure 1:** Epi-curve of COVID-19 outbreaks in all settings notified in Ireland by week of notification and outbreak type (see technical note 5, Appendix 2) to end Week 20 2022, N=23,684. Vertical lines indicate the timeline of epidemic waves of COVID-19 infection in Ireland. Second wave of infection commenced in Week 32 2020 (week beginning 02/08/2020); the third wave commenced in Week 48 2020 (week beginning 22/11/2020); the fourth wave commenced Week 51 2021 (week beginning 27/06/2021); the fifth wave commenced Week 51 2021 (week beginning 19/12/2021)). *Data source: CIDR.* 

#### **Key points**

**23,684** COVID-19 outbreaks have been reported in Ireland since Week 10, 2020 (Figure 1, Appendix 1).

#### Summary Wave 5 (Week 51 2021 to Week 20 2022)

**2,375** COVID-19 outbreaks have been reported from Week 51 2021 onwards and key outbreak locations are as follows:

- 364 (15.3%) were reported in hospitals
- 669 (28.2%) were reported in nursing homes
- 92 (3.9%) were reported in community hospital/long-stay units
- 747 (31.5%) were reported in residential institutions
- 167 (7.0%) were reported in 'other' healthcare services
- 114 (4.8%) were reported in schools
- 14 (0.6%) were reported in childcare facilities
- 208 (8.8%) were reported in a range of other settings

**2,154** outbreaks have been closed and **221** are open (See Appendix 1, Table A for breakdown of outbreaks by location and outbreak status. Note that it is common practice not to close private house outbreaks on CIDR due to the large volume of outbreaks in this category).

#### Summary Week 20 2022

In Week 20 2022, there were 29 COVID-19 outbreaks notified.

The overall number of outbreaks notified in Week 20 2022 decreased by 28\* compared to Week 19 2022. There were:

- 7 outbreaks associated with acute hospitals notified
- 5 outbreaks associated with nursing homes notified
- 3 outbreaks associated with community hospital/long-stay units notified
- 10 outbreaks associated with residential institutions notified
- 3 outbreaks associated with other healthcare services notified
- 1 outbreak associated with schools notified
- Two outbreaks were late notifications from March and April 2022

\*Please note that 17 outbreaks in week 19 2022 were late notifications.

## COVID-19 Outbreaks/Clusters in Residential Facilities and Hospital settings in Ireland

A summary of COVID-19 outbreaks linked to nursing homes, acute hospitals, community hospital/long-stay units, and other residential institutions is shown in Figure 2 and in the subsequent "Focus" sections, Tables 3-5 and Figures 3-5.

**Figure 2:** Epi-curve of COVID-19 outbreaks in: Acute Hospitals, Nursing Homes, Community Hospitals/Long-stay units and Residential institutions notified in Ireland by week of notification, Wave 5. *Data source: CIDR* 

**Table 1:** Number of COVID-19 outbreaks notified in Ireland by outbreak location and by week of notification Wave 5, and difference in number of outbreaks notified in Week 20 2022 compared to the previous week, N=2,375. *Data source: CIDR*

#### Appendix 2

#### **Technical Notes**

- 1. Data are based on statutory notifications and were extracted from the National Computerised Infectious Disease Reporting (CIDR) system. Data are provisional and subject to ongoing review, validation and update. As a result, figures in this report may differ from previously published figures.
- 2. For surveillance purposes, the following COVID-19 outbreak definition is used for notifying **Confirmed**<sup>3</sup> COVID-19 outbreaks/clusters:
- There is a cluster/outbreak, with two or more cases of laboratory confirmed COVID-19 infection regardless of symptom status. This includes cases with symptoms and cases who are asymptomatic.

OR

- There is a cluster/outbreak, with two or more cases of illness with symptoms consistent with COVID-19 infection (as per the COVID-19 case definition), and at least one person is a confirmed case of COVID-19.
- 3. This report includes confirmed and suspected COVID-19 outbreaks.
- 4. An "Open" or "Closed" outbreak is defined as an outbreak where the outbreak status is "Open" or "Closed" on CIDR. In order to declare an outbreak "Closed" the outbreak location should not have experienced any new cases of infection which meet the case definition for a period of 28 days (two incubation periods).
- 5. Outbreak type (family/general) indicates whether an outbreak is confined to a family (family outbreak) or affects members of more than one household (general outbreak).
- 6. The "range in number of cases" presented in Tables 3 to 8 is based on laboratory confirmed cases linked to an outbreak in CIDR. The priority is to notify outbreaks to CIDR in a timely fashion and, while every effort is made to link cases to outbreaks as quickly as possible, there can sometimes be a delay in linking cases to the outbreak. Ranges in number of cases that include "0" include outbreaks that currently have no linked cases. Data in CIDR are continuously reviewed and updated and this includes the identification and linking of outbreak-associated cases.

<sup>&</sup>lt;sup>3</sup> From September 21<sup>st</sup> 2020, suspected COVID outbreaks should be reported with the disease category 'Acute Respiratory Infection (ARI)'. If one or more cases linked to the outbreak are subsequently confirmed as COVID-19, the ARI outbreak should be reclassified to being a COVID-19 outbreak. Outbreaks of suspected COVID-19 which were notified before September 21<sup>st</sup> 2020, and met the previous COVID-19 outbreak definition should remain as COVID-19 outbreaks on CIDR. The COVID-19 case definition is detailed on the HPSC website
