

Cosain do naíonán nuabheirthe ar an Víreas Sincítiach Riospráide (RSV)

Protect your new born baby against Respiratory Syncytial Virus (RSV)

Is féidir le RSV a bheith ina chúis le breoiteacht thromchúiseach i naíonáin

Tá an t-imdhíonadh ar RSV idir shlán sábháilte agus éifeachtach, agus molann an Roinn Slainte, Feidhmeannacht na Seirbhíse Slainte (HSE) agus an Coiste Comhairleach Náisiúnta um Imdhíonadh é le do naíonán a chosaint ar bhreoiteacht thromchúiseach.

RSV can cause serious illness in babies

RSV immunisation is safe and effective and is recommended by the Department of Health, HSE and the National Immunisation Advisory Committee (NIAC) to protect your baby against serious illness.

Labhair le do dhochtúir nó do chnáimhseach
faoi do naíonán a chosaint ar RSV

Talk to your doctor or midwife about
protecting your baby against RSV
