

# IMMUNISATION UPTAKE STATISTICS FOR IRELAND

A REPORT BY THE NATIONAL DISEASE SURVEILLANCE CENTRE

Quarter 3-2003

April, 2004

## Summary

In Quarter 3-2003, national uptake rates in children at 12 months of age increased by 1% for all antigens with the exception of MenC<sub>3</sub> which remained unchanged when compared with Q2-2003. Uptake rates for D<sub>3</sub>, T<sub>3</sub>, Hib<sub>3</sub> and Polio<sub>3</sub> were 81% while the uptake rates for P<sub>3</sub> and MenC<sub>3</sub> were 80%. Quarter 3-2003 is the first quarter where uptake rates for the BCG vaccination are presented. Where data was available an uptake rate of 87% was reported for the BCG vaccination. At 24 months, national uptake rates for all antigens increased by 1-3% when compared with the previous quarter. Uptake rates at 24 months for D<sub>3</sub>, T<sub>3</sub>, Hib<sub>3</sub>, and Polio<sub>3</sub> were 87%, P<sub>3</sub> uptake was 86%, MenC<sub>3</sub> uptake was 85% and MMR<sub>1</sub> uptake was 80%.

## Introduction

The immunisation uptake statistics presented in this report relate to children 12 and 24 months of age in Quarter 3-2003 and who have received three doses of vaccines against diphtheria (D<sub>3</sub>), pertussis (P<sub>3</sub>), tetanus (T<sub>3</sub>), *Haemophilus influenzae* type b (Hib<sub>3</sub>), polio (Polio<sub>3</sub>), Meningococcal group C (MenC<sub>3</sub>), one dose of vaccine against measles, mumps and rubella (MMR<sub>1</sub>; uptake at 24 months only) and one dose of BCG vaccine (BCG; uptake at 12 months only). These statistics therefore relate to uptake in the cohorts born between 01/07/2002 & 30/09/2002 and 01/07/2001 & 30/09/2001.

## Results

### Immunisation uptake at 12 months in Quarter 3-2003

Immunisation uptake rates in children 12 months of age in Quarter 3-2003 are presented (Table 1). National uptake rates for D<sub>3</sub>, T<sub>3</sub>, Hib<sub>3</sub> and Polio<sub>3</sub> were 81% at 12 months and were 80% for P<sub>3</sub> and MenC<sub>3</sub>. The highest uptake rates at 12 months were reported by the NWHB at 87-89%, while the lowest rates were reported in the ERHA at 76-77% (Table 1).

National uptake rates all antigens at 12 months increased by 1% compared to the previous quarter with the exception of MenC<sub>3</sub>. Three of the eight health boards reported increases in uptake rates for all vaccines; WHB (4% for all vaccines), SHB (3% for all vaccines) and MHB (1-2%) [Appendix 1]. Decreases in uptake rates were reported in 2 instances only:

MenC<sub>3</sub> uptake decreased by 2% to 76% in the ERHA and Hib<sub>3</sub> uptake decreased by 1% to 88% in the NWHB.

Quarter 3-2003 is the first quarter where uptake statistics for the BCG vaccination are presented. Data is available for 5 of the 8 health boards at this time covering less than half of the Q3-2003 birth cohort (data from SHB relates to Kerry CCA only). Where data was available, uptake was 87% for the BCG vaccination.

Vaccination coverage statistics for children 12 months of age in Quarter 3-2003 were 95-96% in Northern Ireland<sup>1</sup> and 91-92% for the United Kingdom as a whole<sup>2</sup>.

**Figure 1.** Quarterly immunisation uptake rates at 12 months in Ireland (Note: scale ranges from 60-95% uptake)

### Immunisation uptake at 24 months in Quarter 3- 2003

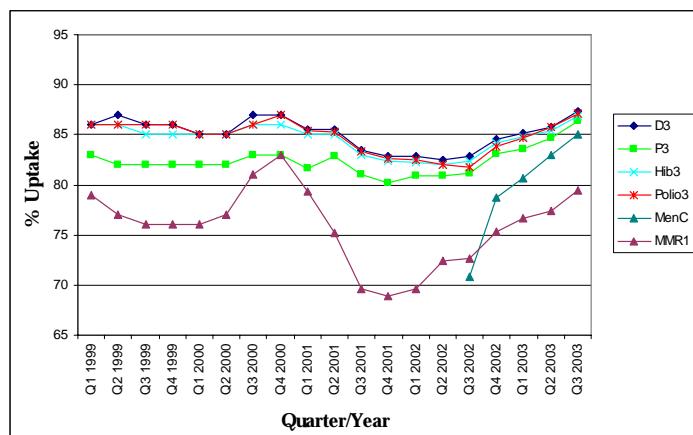

Immunisation uptake rates in children 24 months of age in Quarter 3-2003 are presented (Table 2). National uptake rates were 87% for D<sub>3</sub>, T<sub>3</sub>, Hib<sub>3</sub> and Polio<sub>3</sub>, and 86% for P<sub>3</sub>. Uptake rates for these vaccines ranged from 84% in the ERHA up to 93-95% in the NWHB (Table 2). The target uptake rate of 95% was reached for both D<sub>3</sub> and T<sub>3</sub> in the NWHB in Q3-2003.

Uptake for MenC<sub>3</sub> at a national level was 85%, the ERHA having the lowest uptake rate at 81% and the NWHB having the highest uptake rate of 94%. MMR<sub>1</sub> uptake was 80% nationally, ranging from 75% in the ERHA to 88% in the MHB (Table 2).

In Q3-2003, national uptake rates increased by 1-3% for all vaccines when compared with Q2-2003. Six of the 8 health boards reported increases in uptake for all vaccines. The largest increases were reported by the WHB (2-6%), NEHB (1-5%) and SEHB (2-4%). No health board reported a decrease in uptake for any vaccine.

**Table 2.** Immunisation uptake rates in children 24 months of age in Quarter 3- 2003

Health Board	No. in cohort	% Uptake at 24 months						
		Cohort born 01/07/2001 – 30/09/2001

**Figure 2.** Quarterly immunisation uptake rates at 24 months in Ireland (Note: scale ranges from 65-95% uptake)

### MMR<sub>1</sub> uptake by Health Board

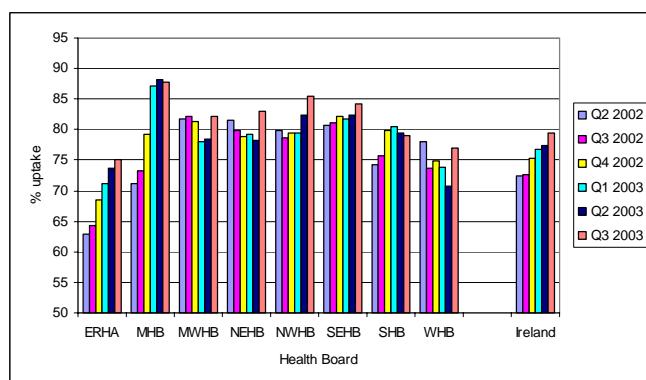

In Q3-2003, the national MMR<sub>1</sub> uptake rate at 24 months was 80%. This represents a 3% increase on the same figure from the previous quarter. MMR<sub>1</sub> uptake rates increased in all health boards by between 1 and 6% with the exception of the MHB and SHB where uptake rates remained unchanged when compared with Q2-2003. As was the case in Q2-2003, the highest uptake rate for MMR<sub>1</sub> uptake was recorded in the MHB (88%).

**Table 3.** National quarterly immunisation uptake rates (%) at 24 months

<b>Q3 2003</b>	87	86	87	87	87	80

Note: Prior to Q3-2002, NWHB provided DTaP/DT uptake as combined value, since not possible to accurately determine P<sub>3</sub> uptake for this health board, it was excluded from overall P<sub>3</sub> analysis

The national MMR<sub>1</sub> uptake rate remains 3% below the uptake rate reported in Q4-2000 and 15% below the national target rate of 95% uptake.

**Figure 3.** Quarterly MMR<sub>1</sub> uptake rates at 24 months by health board from Q2 2002 to present (Note: scale ranges from 50-95% uptake).

In Quarter 3-2003, vaccination coverage statistics at 24 months for D<sub>3</sub>, P<sub>3</sub>, T<sub>3</sub>, Hib<sub>3</sub>, Polio<sub>3</sub> and MenC<sub>3</sub> were 96-97% in Northern Ireland<sup>1</sup> and 93-94% for the United Kingdom as a whole.<sup>2</sup> MMR<sub>1</sub> uptake was 87% in Northern Ireland<sup>1</sup> and 80% in the UK.<sup>2</sup>

Detailed quarterly immunisation uptake statistics at 12 and 24 months for each health board are presented in Appendix 1 & 2 of this report.
